BEST IF VIEWED BY TAPPING THROUGH REALLY REALLY FAST

THIS STUDIO REFRAMES TWO COMMONLY MISUNDERSTOOD IDEAS IN ARCHITECTURE—MINIMALISM AND PRAGMATISM—NOT AS AESTHETICS OR SHORTCUTS, BUT AS DEEPER DESIGN APPROACHES. MINIMALISM OFTEN HIDES LABOR AND COMPLEXITY BEHIND VISUAL PURITY, WHILE PRAGMATISM IS FREQUENTLY USED TO JUSTIFY GENERIC, OVERLY EFFICIENT SOLUTIONS. INSTEAD, THE STUDIO PROPOSES "PRACTICALISM," AN APPROACH THAT EMBRACES REAL CONSTRAINTS, CONSTRUCTION SYSTEMS, AND REPETITION WITHOUT REDUCING DESIGN TO EITHER PURE SIMPLICITY OR PURE FUNCTIONALITY. THE COURSE EXPLORES THIS MIDDLE GROUND THROUGH PRECEDENT STUDIES OF MINIMALIST LEGACIES AND CULMINATES IN A FOCUSED, PRECISE MULTI-FAMILY HOUSING PROJECT IN BERKELEY, CA.

THIS ADAPTIVE REUSE PROJECT REWORKS AN EXISTING CAMPUS BUILDING AT UC BERKELEY WHILE PRESERVING ITS ORIGINAL FLOOR SLABS AND COLUMN STRUCTURE. A SERIES OF TALL, SLENDER INTERIOR INSERTIONS ARE INTRODUCED WITHIN THIS INHERITED FRAMEWORK, OVERLAPPING TO GENERATE LAYERED, INTERSTITIAL SPACES THAT ENCOURAGE MOVEMENT AND EXPLORATION. THESE FORMS CREATE A RANGE OF SPATIAL CONDITIONS—ALTERNATING BETWEEN COMPRESSED AND OPEN VOLUMES—THAT ESTABLISH A RHYTHMIC SEQUENCE THROUGH THE BUILDING. LIGHT IS FILTERED FROM ABOVE THROUGH AND BETWEEN THE INSERTIONS, PRODUCING SHIFTING INTERIOR ATMOSPHERES THAT REINFORCE DEPTH AND VARIATION WITHOUT ALTERING THE PRIMARY STRUCTURAL SYSTEM.

THIS PROJECT WAS STRUCTURED AROUND BETTER UNDERSTANDING CONSTRUCTION METHODS AND SYSTEMS THROUGH LOOKING AT A SPECIFIC CASE STUDY THROUGH THE LENS OF A KEY DESCRIPTIVE WORD. FOR MY GROUP AND I OUR WORD WAS “GENERIC.” WE WERE THEN TASKED WITH CHOOSING A PRECEDENT THAT FIT INTO THE CATEGORY OF “GENERIC.” WE SETTLED ON THE BRUTHER CULTURAL AND SPORTS CENTER. AS A GROUP WE WERE INTERESTED IN THE STANDARD ELEMENTS AND SYSTEMS IN THIS BUILDING AND HOW THAT LENT ITSELF TO BE PROGRAMMATICALLY FLEXIBLE, ECONOMICALLY FEASIBLE, AND ITS MATERIAL HONESTY. THROUGH THE PROCESS OF THIS PROJECT I GAINED A BETTER APPRECIATION FOR HOW GENERIC AND STANDARD SYSTEMS IN BUILDINGS CAN BRING VALUE WHERE BESPOKE ELEMENTS CANNOT.

1. Metallic Tube 100cm x 60cm - Cladding Support
2. Translucent Vault
3. Raw Concrete Perimeter Beam
4. Vertical Cladding - Pre Lacquered Perforated Steel
5. Vertical Cladding - Powder Coated Perforated Steel
6. Curtain Wall With Opening Panels - Ventilation and Smoke Extraction
7. Sunscreen - Wire Guided Roller Blinds
8. Sports Pavement on Concrete Slab 20mm
9. Screed Quartz - Translucent Finish
10. Galvanized steel guardrail
11. Hardware for Guiding Cable
12. Glazed louver system for natural ventilation - Brand, Luxlame Souchier
13. Aluminum joinery crosspiece - Thermal break profile
14. Concrete slab edge - Height = 300 mm
15. Anodized aluminum finish cover cap
16. Pressed mesh grating with 100 mm metal flat bar fixed on slab edge
17. Bent metal flat bar - aluminum finish
18. BA13 plasterboard on metal frame
19. 135 mm mineral wool insulation
20. Vertical aluminum joinery upright - profile preventing thermal bridge - box finish
21. Aluminum shading blade
22. Concrete Slab 250mm
23. Fabric roller blind with cable guide
24. Secondary metal structure supporting cladding
25. Intermediate gutter
26. Curved IPE140 roof support fixed to truss beam
27. High-density insulation
28. Reinforced steel gutter + waterproofing / possible walkway
29. Steel beam supporting gutter
30. Steel truss beam - Height = 1m
31. Suspended LED lights

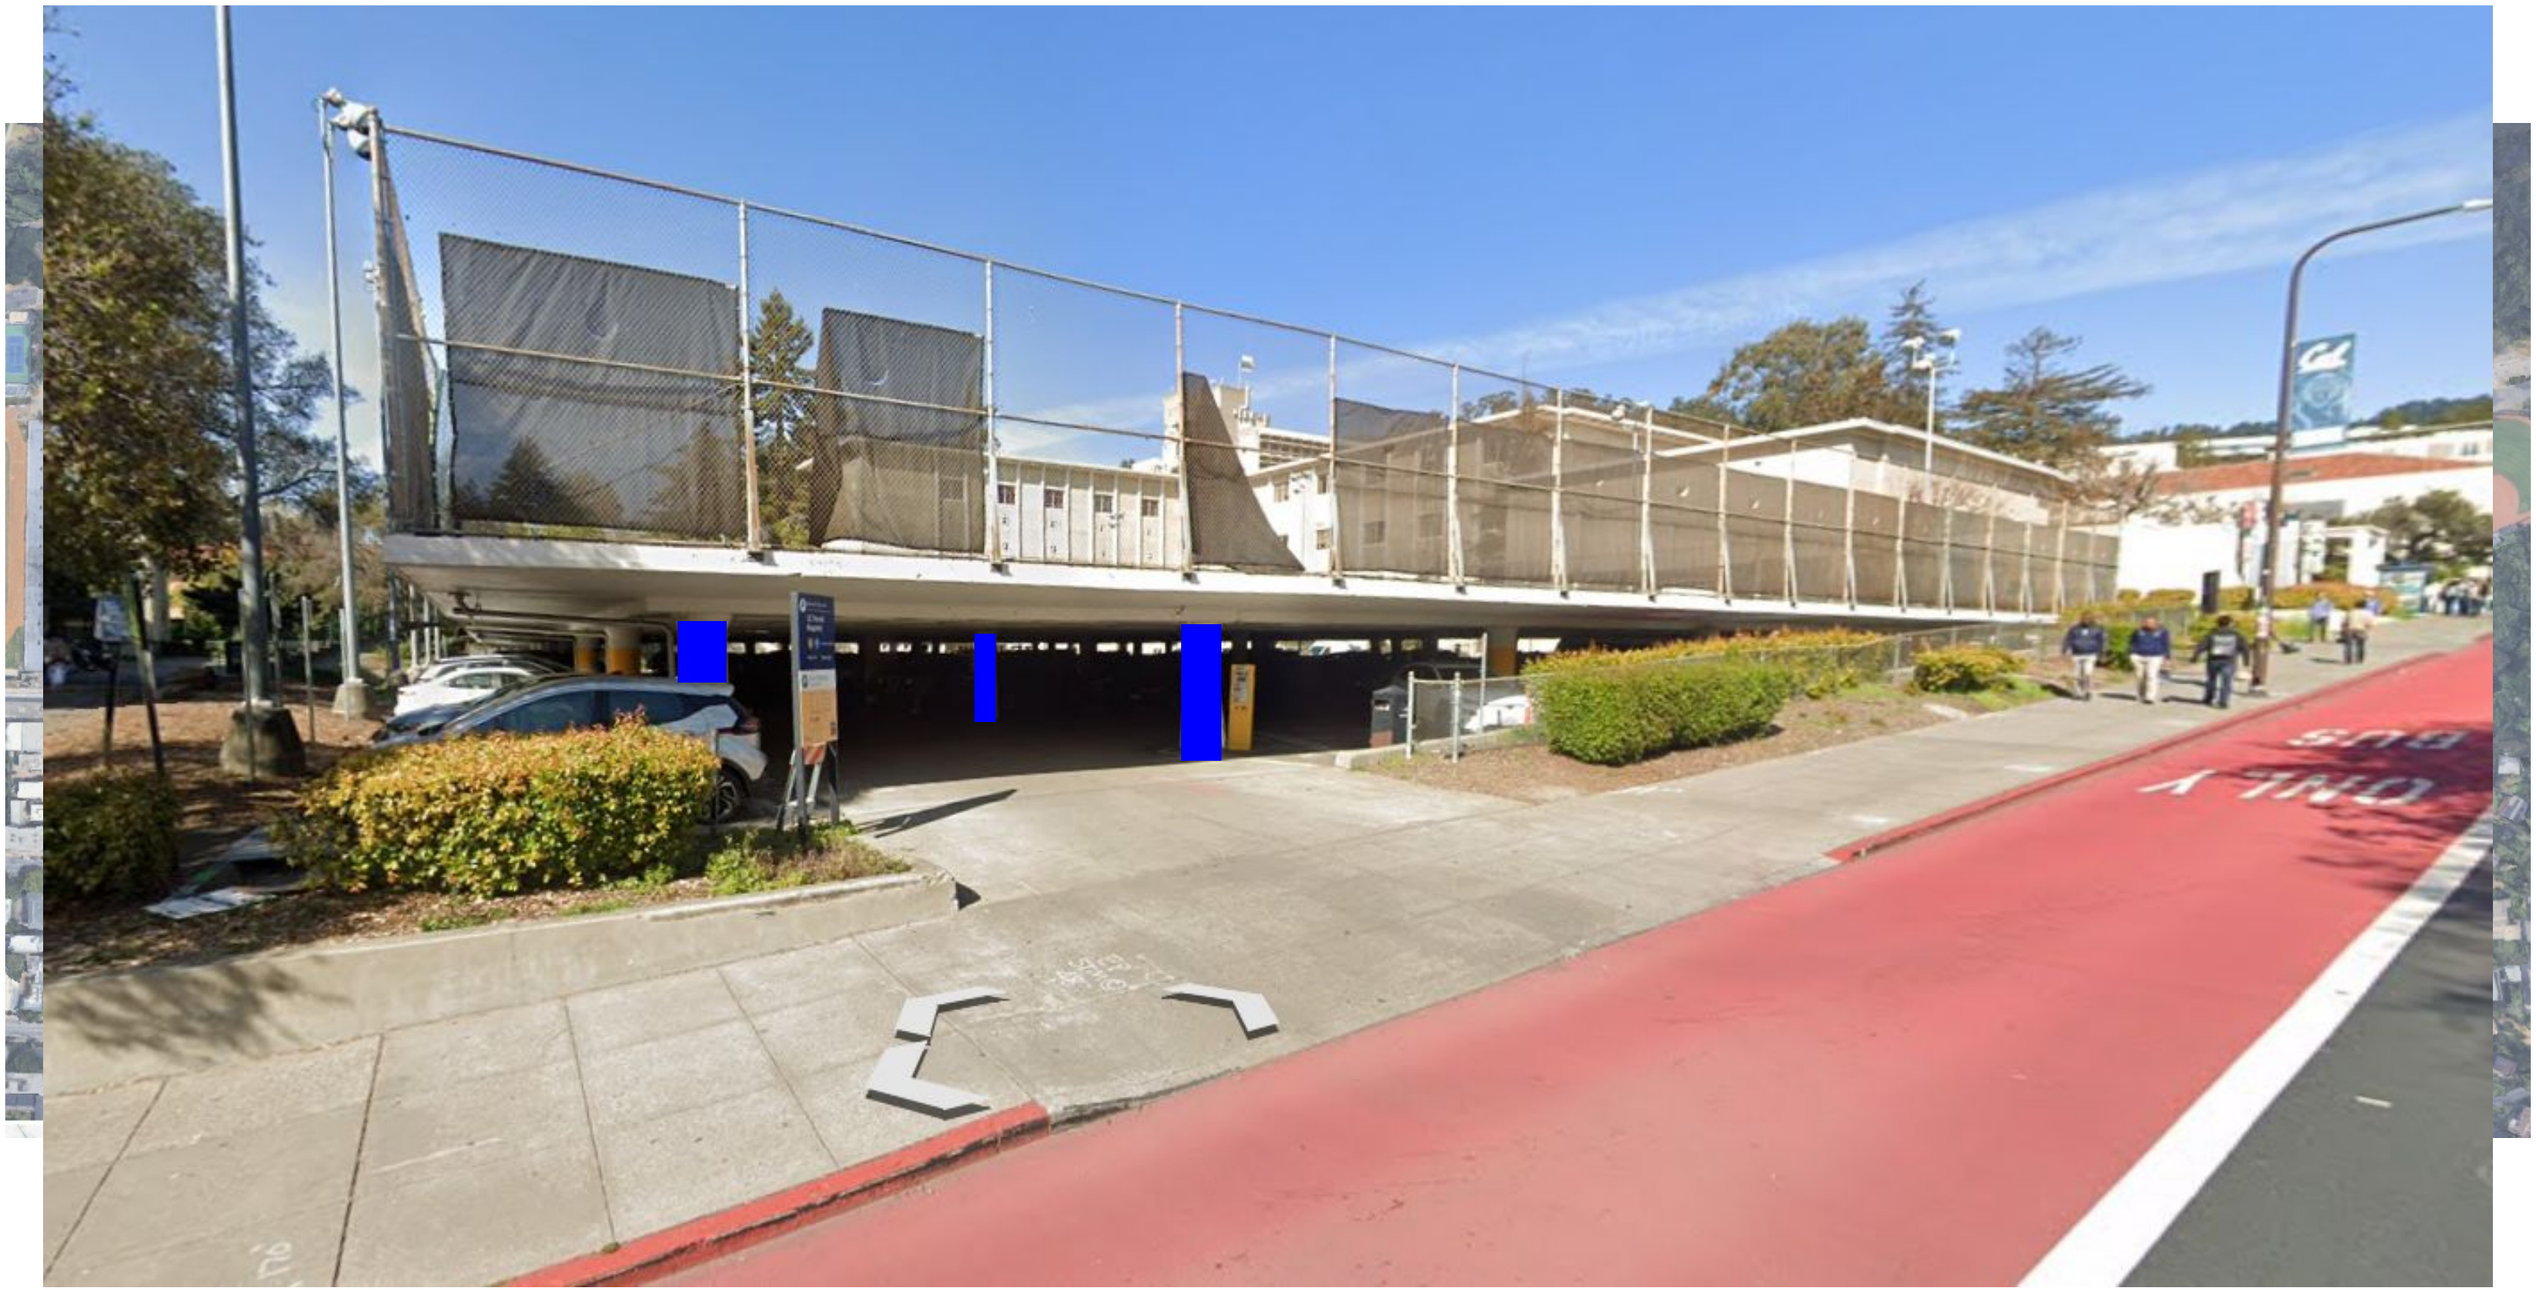

THIS PROJECT EXPLORES ADAPTIVE REUSE THROUGH THE DESIGN OF A PAVILION CONSTRUCTED ATOP AN EXISTING CAMPUS PARKING STRUCTURE AT UC BERKELEY. THE PROPOSAL RESPONDS TO THE SITE'S WESTERN ORIENTATION, FRAMING VIEWS AND ENGAGING SHIFTING LIGHT CONDITIONS AS THE SUN SETS OVER THE BAY. THE FORM EMERGES FROM A SUBTLE SHEARING OF THE STRUCTURE, CREATING RIDGES THAT ADMIT LIGHT WHILE REDUCING VISUAL AND PHYSICAL IMPACT ON SURROUNDING BUILDINGS. THIS STRATEGY BALANCES SPATIAL EXPERIENCE WITH CONTEXTUAL SENSITIVITY. STRUCTURALLY, THE PAVILION RELIES ON SIMPLE, LEGIBLE MEMBERS, DEMONSTRATING HOW RESTRAINED SYSTEMS AND MINIMAL MEANS CAN GENERATE A CLEAR AND EXPRESSIVE ARCHITECTURAL PRESENCE.
